RANDOLPH TECHNICAL INSTITUTE IS GROWING Diane Cauble

Randolph Technical Institute opened in 1962 as an industrial training center. Classes began with 75 students; Auto Mechanics, Electrical Technology, Electronics, Machine Shop, Welding were the first programs. After the first year, Cultural Business was added. The Center became Randolph Technical Institute on October 2, 1965. This allowed the Associate in Applied Science Degree to be awarded instead of a diploma. The school is currently going into its sixth year of operation. Along with the regular day programs, it offers a variety of evening courses. Special emphasis is placed on the Learning Lab for those desiring to complete their high school education. Randolph Tech is governed by a twelve-member board of trustees. The school operates under the direction of M. H. Branson, President. The staff includes J. L. Linker, Voc-Tech Programs; J. L. Roberson, Student Services; W. A. Edwards, Extension; and J. D. Bullard, Adult Education. The Institute continues to grow with the new building now in progress and new programs in the final stages of development. Randolph Tech is one of 50 institutes in the Community College System of North Carolina. It includes 13 community colleges, 20 technical institutes, and 7 technical institute units. Accredited by the North Carolina State Department of Community Colleges under the Board of Education, RTI is situated on a 25-acre campus just south of the business district in Asheboro. Located between 220 By-pass and Fayetteville Street, the school is easily accessible from Highways 64 and 220. Conditional in nature, the school offers a personalized, individual approach to education beyond the high school. If you are interested in being more than just a number, then Randolph is the school for you.
